Professional Summary

Security practitioner and IT professional with a proven track record in security operations, software development, service delivery, automation, data engineering and infrastructure. I specialise in building tools that reduce manual work, improve visibility, and support better security decisions. My current role spans incident response, threat hunting, vulnerability management, privileged access, vendor risk management, and security metrics within an ISO 27001-certified global enterprise. With a strong foundation of IT skills and a natural inclination towards continuous learning, I'm able to rapidly acquire new skills and thrive in challenging environments.

Technical Expertise

- **Security Operations:** CrowdStrike, Microsoft Defender XDR, Mimecast, Netskope, CyberArk, Rapid7, Joe Sandbox, Sumo Logic, Absolute
- **Security Domains:** Incident Response, Phishing Triage, Threat Hunting, Detection Engineering, Threat Intelligence, Vulnerability Management, Privileged Access Management, Third-Party Risk, ISO 27001 Operating Environments
- **Infrastructure & Identity:** vSphere, SCCM, Microsoft Entra ID / Azure AD, PIM, Active Directory
- **Cloud:** Azure, Microsoft 365, Exchange Online, Identity and Access Management, PIM
- **Development & Automation:** TypeScript, React, Next.js, C#, SQL, SQL Server, PowerShell, Power Platform (Apps/Automate/BI), Cherwell, Tailwind CSS, Git, GitHub

Experience

Ashurst

Cyber Security Analyst

March 2026 – Present

- **Incident Response & Brand Protection:** Investigate and contain ~100 phishing incidents per week using EDR and email gateway tooling. Led 20+ takedowns of impersonation and lookalike domains, coordinating with registrars, hosting providers, and legal teams.
- **Threat Intelligence & Vulnerability Management:** Led intel investigations from security advisories, hunting on IOCs and TTPs, leveraging EDR telemetry and SIEM logs, producing reports on findings and recommended actions tailored for an executive-level audience.
- **Governance, Risk & Compliance:** Assess third-party vendors and software against ISO 27001, pen test results, and data flow architecture. Assess 10–20 privileged access requests monthly, balancing least privilege with business requirements. Operation and management of the PAM platform.
- **Detection Engineering & Tooling:** Developed detection rules to catch recurring phishing patterns automatically. Built a Power BI dashboard pulling from internal ticketing systems to track SLA compliance, ticket volume, and incident categorisation across the SOC.
- **Collaboration:** Worked with and maintained rapport with numerous other IT and non-IT teams, ranging from providing advice to project support. Led initiatives resulting in meaningful security outcomes. Provided training and mentorship to junior team members.

Information Technology Graduate

March 2025 – March 2026

12-month rotational program across Data Engineering, Server & Compute, and Cyber Security teams.

- **Cyber Security:** Phishing triage, EDR threat hunting, and vulnerability management within the SOC, leading directly to appointment as Cyber Security Analyst.
- **Data Engineering:** Built Power Platform pipelines and maintained SQL Server warehouse infrastructure across APAC, eliminating ~10 hours per week of manual processing and shipping 10+ visualisations for legal teams.

- **Server & Compute:** Patched server infrastructure via vSphere and SCCM, executed change control processes, and supported Azure AD and identity work; configured network switching and UPS hardware.

Service Desk & Automation Developer

December 2023 – March 2025

- Built a self-service IT portal in Cherwell and PowerShell, cutting ticket volume by 9% across 3,000+ employees and saving ~90 hours of manual work monthly.
- Created Power BI dashboards on service metrics for IT leadership.

Great Southern Bank

March 2023 – May 2023

Information Technology Intern

- Built a Vue.js and Tailwind CSS monitoring interface giving Digital IT real-time visibility across 9 systems.
- Authored 6 Service Management Plans covering business continuity and disaster recovery for company-owned software, coordinating with vendors to confirm and document response-time SLAs.

Queensland Health

March 2022 – October 2022

Junior Software Developer

- Built a Power Platform automation flow processing 1,000+ documents per month and saving 20 hours per week.
- Designed a Power Apps interface for 100+ staff that cut manual data entry by 70%.

Certifications

- **ITIL 4 Foundation Certificate in IT Service Management**, PeopleCert (*May 2025*)
- **Blue Team Level 1 (BTL1)**, Security Blue Team (*currently studying*)

Education

Queensland University of Technology

Graduated 2023

Bachelor of Information Technology, Computer Science major

Minors in Intelligent Systems and Networks & Security
